# Reece Irrigation Design

Reece Irrigation Design provides professional design services, specifications and quotations for irrigation and water management systems.

We apply the latest technology and practices to provide reliable and cost effective solutions for Councils, Builders, Architects, Landscape Designers and Engineers.

Our range of services will help your customers enjoy a sustainable water future whilst maintaining the look and feel of your original landscape designs.

## **Consulting Services**

Reece Irrigation Design is dedicated to supplying customised irrigation and water management solutions for any project, from small residential jobs through to large commercial and agricultural developments.

We review the unique characteristics of every job in order to design the most practical and effective solution for your project.

Our designs also look beyond initial construction costs, to consider long term management and annual water / power spending.

**Tailored  
solutions  
for every  
project**

Depending on your needs, Reece Irrigation Design can provide complete and detailed construction drawings, installation details, product specifications, tender documents and quotations.

Our professional design packages are developed using superior knowledge, sound engineering and computer packages including AutoCAD and IrriCAD.

Using these tools, we guarantee that our designs provide accurate and cost-effective solutions tailored for every project.

### **Quality Specifications**

All Reece Irrigation designs can be accompanied by a detailed product specification. This ensures that project construction is completed to the same high standards as our designers intend.

Reece has a long history of providing only the best quality products which exceed Australian Standards and consistently perform to the highest standards.

### **Tender Analysis**

Our comprehensive design package makes assessing tender submissions far easier than ever before.

By complementing our designs with a schedule of rates, we make sure that tenderers remember to include everything in their price.

This gives you multiple reference points for comparison and can also help to identify contract variations and pricing discrepancies.

# Complete Solutions

Our team members have a variety of qualifications ranging from 'Certified Irrigation Designers' (Irrigation Association of Australia) to Horticultural Degrees. Every design we offer combines expertise with years of industry experience.

We offer specialist knowledge in many areas including;

- Pumping Systems
- Waste Water Reuse
- Soil Moisture Monitoring
- Filtration & Treatment
- Central Control & Monitoring Systems
- Water Harvesting & Transfer

## **Saving Water**

We combine specialist knowledge with a thorough understanding of local water regulations to design efficient irrigation systems that meet local requirements and maintain lush, healthy landscapes.

Our certified Irrigation Auditors can also aid long term water conservation by conducting on site evaluation of irrigation system design, management and maintenance.

## **Adding Value to Your Business**

Reece Irrigation Design helps you add value to your business by treating you as business partners. We provide a total irrigation solution for your landscapes, allowing you to present a complete landscape package for your clients.

Combining our knowledge with your creativity, we guarantee that your clients will continue to be delighted with their beautiful landscape in every season for many years to come.
