

## **Bathroom Trends by Reece**

### **Basins**

- Trend towards unique, stylish lines combining both square and round characteristics
- Above counter basins are an impressive feature in any bathroom
- Basins are now being manufactured from pressed steel to offer greater durability, precise cornering and a glamorous finish

### **Vanities and storage options**

- Vanity units are the perfect storage solution for any bathroom. Particularly when they offer deep draws, generating a large amount of easy to access storage space
- Vanity units with china tops are an elegant alternative to the conventional acrylic tops
- Wall hung vanity units with rectangular features basins appeal to the modern bathroom design

### **Bath tubs**

- Deep soaker baths, to maximize small spaces
- Modern Freestanding baths with smooth, inviting curves
- The latest bath trends have been designed to satisfy the desire for revitalisation and indulgence. Such as the clever design of the Dolce Vita Isle bath which can be fully fitted as a hydrotherapy spa making bathing a deeply sensuous experience.

### **Shower units and heads: perhaps look at water saving options**

- AAA rated showers which only use 9 litres per minute as opposed to the conventional 15-22 litres. This can result in potential water saving of 65 litres for every 5 minute shower.
- The shower is now being incorporated into the entire bathroom design. Glass panels and floor to ceiling windows with a garden or ocean view can create a tranquil setting.
- Easy to install shower systems with shower base, glass screen and easy to clean acrylic walls offer a great alternative for people with busy lifestyles and limited space
- Ceiling mounted showers

## Toilets

- Back to wall concealed toilet suites with no exposed pipes, combine sophistication and style to produce a modest and tasteful suite that is easy to clean and appealing to the eye.
- Wall hung and back to wall pans with concealed cisterns are unobtrusive, stylish and a fantastic space saver in any bathroom.
- Mainsflush combines technology and minimalism that has revolutionised the toilet flush and eliminated the need for a conventional cistern. Operated by a SonicSense touch pad, it opens the door for countless bathroom design possibilities.

## Overall look of the bathroom

- Now more than ever, your bathroom design is an expression of yourself where almost anything goes. Bathroom fixtures, fittings and colour choices can all have a striking impact depending on how they are positioned and used throughout your bathroom.
- The bathroom is no longer just a place to wash off the day's dirt. It has become a sanctuary in the home; the perfect haven to relax, rejuvenate and unwind.
