Hideaway Active
The intelligent urinal

With a range of self-diagnostic features designed to maximise water efficiency, the Hideaway Active Urinal delivers exceptional value for commercial or residential use.

With 4 flushing modes available and using just 0.8 litres per flush, Hideaway Active is the eco-friendly solution that drastically reduces maintenance headaches. Easy installation into standard 90mm stud walls offers total flexibility for all types of applications.

Incorporating superior detection technology the Siphonic Trap offers an unrivalled level of control via the Control Unit, with diagnostics continually providing feedback on everything from battery life to valve life and usage rates.

Automatic touch-free flushing
Self-diagnosing technology
WELS 6 Star efficiency
Fast and easy installation

What makes it so smart?

The Control Unit

Easy to diagnose any problems during routine maintenance or service via the control unit.
A battery powered model can be used when mains power cannot be accessed at the point of installation.
Provided feedback on battery life, usage and valves.
Push button setting allows flush time to be adjusted based on supply pressure.
Easy shut down mode for when manual cleaning is required, and will automatically restart 30 minutes later.

The Hideaway Active urinal features four different touch free flushing modes to suit a variety of uses.

- Normal Mode
  - One flush after every user
  - Mode will automatically switch from normal to saver when there are 3 users or 15 minutes
- Saver Mode
  - One flush after every 2 users or every 15 minutes (default under 5 users)
- Eco Mode
  - One flush after every 3 users or every 15 minutes
- Janitors flush
  - Triggers an automatic hygiene flush after 48 hours of non-use.

Siphonic Flush Trap

Automatic touch free flush ensures maximum hygiene and water efficiency.
Sensors detect urine or change in temperature (not movement) to activate a flush, so there are no false detections, reducing water wastage.
The sensor can detect if the urine bowl is filled with liquid or blocked, and will stop flushing to prevent overflow.

The perfect fit

The Hideaway Active urinal and siphonic trap have been purposely designed to fit into a standard 90mm ventilated trap and floor standoff - with options available for in-ceiling, in-duct and in-wall installation of the controls.

Technical Specifications

6 Star water efficiency

Using just 0.8 litres per flush, the Hideaway Active has been given a WELS 6 star rating - the gold standard for water efficiency in Australia. This makes it the perfect choice for applications where water conservation is a high priority.

Specifications

- Control Unit
- Ceiling space
- Height mounting recommended
  - 610mm
- Horizontal length = 110mm
- Copper Inlet length = 500mm
- Pipe inside wall
- Sensor cable run inside flexible conduit
- Flush valve will be required
- Access into wall to service
- Flush pipe maximum vertical length = 2000mm
- Minimum vertical flush pipe required
- Transformer/Power supply - vacuum breaker - solenoid valve - isolation valve, including: Flush valve
- In-duct installation
- Sensor cable run inside flexible conduit
- Flange outlet to fit side of urinal left or right through wall hole
- In-wall installation
- Sensor cable run inside flexible conduit
- Flange outlet to fit side of urinal left or right through wall hole
- Access into ceiling to service flush valve will be required
- Finishing Floor Level height mounting recommended
  - 600mm

Reece Product Quality Guarantee

Hideaway Active urinal has a 7 year product warranty. For in-ceiling, in-duct and in-wall installation of the control unit, please refer to the manufacturer's warranty for details.
