

# POOL FACT SHEET

## HOW CLOUDY IS YOUR POOL?

### HOW CLOUDY IS YOUR POOL (based on 50,000 litre pool)?

#### **CAN'T SEE THE STEPS**

Add 300ml of Pure Blue Clarifier and run the filter for several days. Check your pressure regularly during this time and back wash should pressure rise to high. For cartridge filters when pressure is high remove cartridge and rinse clean. In this event add a further 200ml Pure Blue Clarifier. Alternatively if you need to clear the pool quickly or believe there will be a lot of debris on the bottom of the pool then you should floc your pool which will drop everything to the bottom of the pool and vacuum to waste. Follow the directions on the pack and make sure the pH is 7.8-8.2. Add 2kg of Pure Blue Floc

#### **CAN JUST SEE THE STEPS**

Add 300ml of Pure Blue Clarifier and run the filter for a further 24 hours. Should there be any debris on the bottom of the pool vacuum to waste.

#### **A LITTE BIT CLOUDY**

Add 1 x Pure Blue Water Clarifier Sparkle Tab and run filter for 12 hours or 200ml of Pure blue clarifier.

#### **NOTE:**

At the completion of the treatment of your pool water, thoroughly clean your filter by using filter cleaner.
