OUR HISTORY

A CENTURY WITHOUT COMPROMISE

The Franke story began as a small sheet-metal business in Rorschach, Switzerland, established by Hermann Franke in 1911. Since then, we've established efficient and economic manufacturing facilities all around the world.

HUMBLE BEGINNINGS

Founded in 1911, Franke was built on a foundation of precision engineering, combined with traditional craftsmanship. Over 100 years later, those principles endure, while a focus on the changing needs and lifestyles of our customers has helped us become the world's largest manufacturer of kitchen sinks.

SWISS PRECISION

Many things have changed in the past century, but what is always the same is a set of values, characterised by respect, trust and openness. The values of innovation, entrepreneurship, quality and stylish design were in the heart of Hermann Franke and continue to be at the heart of the business, as we enter a second century of smart design and stunning beauty.

OUR FUTURE

Franke continues to innovate in key product areas. Helping customers create a kitchen that's as unique as they are, Franke is committed to ensuring they experience the pleasures that cooking, eating and entertaining in a kitchen fitted with their products can bring; this being the essence that inspires us to Make it Wonderful.

As a world leader in the design and manufacture of intelligent products and solutions for residential and professional audiences, Franke continues to lead the way in developing high-end design innovations.

We are extremely proud of what we produce, from state-of-the art sinks to innovative kitchen workspaces. Looking ahead we are delighted to be introducing some impressive new lines into our range.

CHOOSING YOUR PERFECT SINK

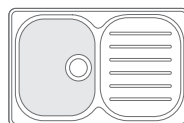

As the kitchen sink is seen as the heart of the kitchen, it's the perfect starting point for creating your dream kitchen. There are however certain functional considerations to take into account and the following information will help to ensure that your ideal sink is the perfect fit for your ideal kitchen.

BOWL & DRAINER CONFIGURATION

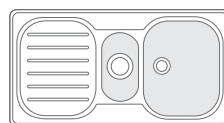

The type and position of your bowl depends on how you intend to use your sink. If you like room to clean large items like grill pans, a larger single bowl may be best for you, or for a multi-functional purpose, you may prefer the versatility of two separate working bowls.

The drainer location is also an important consideration. For many sinks you will need to choose the specific version you prefer - with drainer on the left or right hand side. Whereas other sinks are reversible which indicates the drainer can be positioned on either side.

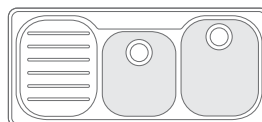

Single Bowl

1 & 1/2 Bowl

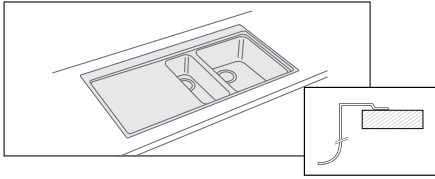

Double Bowl

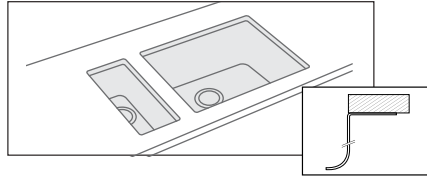

This brochure demonstrates a variety of styles available but in some ranges there are several configurations to choose from in the same style.

INSTALLATION TYPES

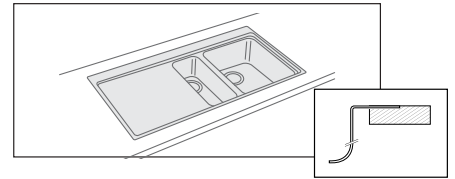

TOPMOUNT SINKS

Topmount sinks are installed from above into a pre-prepared hole in your worktop. It gives you the widest range of sink shapes, sizes and styles to choose from.

UNDERMOUNT SINKS

Undermount sinks are installed underneath the worksurface & require a solid surface such as granite. They are not compatible with laminate worksurfaces.

FLUSHMOUNT SINKS

Flushmount sinks feature a single thickness edge allowing a slimfit to the benchtop which can also be recessed resulting in a flush fit with the surface.

MATERIAL TYPES

STAINLESS STEEL

Franke stainless steel sinks are made from premium quality chrome nickel steel, which looks stunningly beautiful, is highly resistant to staining, rust and corrosion - plus it won't chip, flake or break.

It's the most popular material – and for good reason. Stainless steel has a timeless quality that sits beautifully in a traditional or contemporary style kitchen, offering stunning good looks and a durability that helps keep it looking at its best for years.

FRAGRANITE

Fragranite is an exceptionally tough material containing 80% quartz and 20% resin to form a unique material with a subtle sheen that is warm to the touch.

Kitchens can be a critical location for spreading bacteria. On unprotected material, bacteria can multiply every 20 minutes making surfaces unhygienic. The integrated Sanitized® hygiene function in Fr granite sinks helps to keep this area clean and provides the sink with lasting protection.

FRANKE FOOD PREPARATION CENTRE

Turn your sink into a wonderful work station with our convenient kitchen helpers which are designed to maximise the space you're working with. Whether it be chopping boards, strainer bowls, drainer baskets and more, each piece is designed to be in harmony with your cooking style and needs. Preparation, presentation and cleaning up is easy when you prepare with the right tools.

ROLL KITCHEN CHORES AWAY

Simple and versatile, the Franke rollamats is a wonderful accessory with a host of applications, from a dish drainer to a trivet. Roll it out and you're ready. When you don't need it, just roll it up again.

CUTTING EDGE CHOPPING BOARDS

We've thought hard about our kitchen tools so you can enjoy your wonderful kitchen even more. Our own range of chopping boards combine beauty with practicality in the ideal size for your Franke sink.

LEADERS IN INNOVATION

Every action is effective in a well-organised kitchen. The more kitchen components are tailored to one another, the more seamlessly everyday processes can proceed. And the more convenience they offer, the more pleasant kitchen work becomes. The new Bow Prep Centre takes up this approach and perfects it in the sink area. As a result, the most important kitchen accessories needed to prepare meals – knives, cutting board, and colander – are combined, in a single compact unit, that is always in easy reach.

The Bow Prep Centre is the perfect solution for those who truly value seamless work processes in the kitchen – from the preparation to the cooking itself and all the way to cleaning up afterwards. And when you're not cooking, everything is stored away safely, hygienically and out of sight.

TAP WARRANTY NOTICE

Franke taps purchased through Reece have a full 5 years parts and labour warranty and a further 10 years applies to the cartridge only, plus any faults in product construction, materials and assembly.

Large and heavy taps should ideally be mounted directly through the solid benchtop or fully supported from underneath. For all other swivel taps, we recommend the use of the Franke Tap Support Arm (provided with tap). Please ensure all Franke tapware is installed at a pressure of no greater than 500 kPa in accordance with AS/NZS3500 and insist that your plumber flushes all of the water supply lines before installing tapware. Failure to do so may void warranty.

SPAZIO PLUMBING KIT

SPAZIO PK 945 (2029265)

SPECIFICATIONS OVERVIEW

FINISH

Grey Polypropylene

DESCRIPTION

The space saving solution for installing two and three bowl sinks into one flush fitted outlet, located at the rear of your cabinet. Includes connection points for appliances.

ECO PLUMBING KIT
